EXPERIENCE

UniSearch

UniSearch is a social-commercial network through which users can easily find solutions to whatever they are looking for - a local restaurant, a new car, a new internship or even somebody to cuddle with - from a wide range of viable online providers. Once user types in what they want, the UniSearch engine starts connecting to giant e-commerce platforms and searching through their databases to bring back hundreds of options for the user to choose from.

Technologies: React.JS, Python, Django CMS, Django.

Role: Head of Android/Java/Net Department.

LP1 / SP1- Contribution and Loan management application.

Mission: CoMaS (SP1), which supports the operations of the Kiribati Provident Fund (KPF). The system is accessible, portable and scalable. SP1 has two portals; a private portal which is only accessible within the organization's intranet and a public portal which is accessible to authorized users via the internet.

LP1, which supports the loans and deposits. The system automates the loan process from both, bankers as well as customers' side. Here customers may see various loans provided along with rate of interest and required documents.

by **QAREA**

www.qarea.com business@qarea.com

Both applications support multilingual (mainly English & French) and also conforms to international financial and security standards.

Processes and Management: Adapted Scrum.

Roles: Project manager, solution architect.

Team: 2 .NET developers, 2 JavaScript developer, 1 QA.

Technologies:

- Architecture and infrastructure: Azure cloud, Rest Services;
- Languages: C#, JavaScript;
- Frameworks: ASP.NET MVC, Angular;
- DBs: MS SQL Server 2013 (MS Reporting).

Duration: More than 2 years active development, support.

Code Quality (JIRA add-on)

Code Quality is an all-in-one toolkit for Jira/Jira Cloud that helps developers and managers to control the quality of written code at every stage of a project development. This allows managers and business owners to systematically track the personal results of developers or the whole team and contributes to the evolution of trust relationships within the project members.

Technologies: React.JS, Jira, MySQL, Golang(GO).

Role: Head of Android/Java/Net Department.

Advisor - Australian insurance web solution.

Mission: Web platform for management customer insurances in one place. This application helps to find and assign nearby insurance broker.

Processes and Management: Adapted Scrum.

Roles: Project manager, solution architect, Team Leader.

Team: 3 PHP developers, 1 Frontend developer, 1 QA.

Technologies:

- Architecture and infrastructure: AWS cloud;
- Languages: C#, JavaScript;
- DBs: MS SQL Server.

Duration: 4 months active development, support.

Project Under NDA

Mission: This enterprise site factory approach that allows for the build and launch of many sites for the cost of just a few. A company can quickly spin-up a new site within a replica of the established structure of an existing site, then configure and customize the new site specific to the needs of the brand or business.

Processes and Management: Adapted Scrum.

Roles: Project manager, solution architect.

Team: 1 developer, 1 QA.

Technology:

- Architecture and infrastructure: Azure cloud;
- Languages: C#;
- DBs: Mysql DB cluster, Apache solr, Memcached.

Duration: 4 months active development.

Car & Truck Rental Service

The Car & Truck Rental web portal gives people the ability to rent vehicles, thus covering personal vehicle needs for those traveling around Canada, moving their home, towing a boat, or moving their belongings to a new university dorm. The client's plan was to transform the cross-platform and cross-browser portal into a Software as a Service (SaaS) solution and expand to other countries and markets.

Role: Head of Android/Java/Net Department.

Application for viewing scientific posters

This is a mobile application for iOS and Android that allows users to publish and view scientific posters while listening to audio explanations about their content. The goal of the app is to help users advance their knowledge in different scientific domains through visual and audio insights from conferences and lectures.

Technologies: Automation Testing, System & Unit Testing, OS Android, Acceptance Testing, Regression Testing, QA, Android.

Role: Head of Android/Java/Net Department.

EDUCATION

- Saint-Petersburg Academy Methods and Management Engineering. Master of Information systems and programming;
- Donbass State Machine-building Academy. Master of production automation, electronics.
