For the needs of our company, we implemented additional modules for Odoo ERP system and highly customized UI/UX. We customized the following modules: Finance, Project, Human Resources, and Recruiting. Also, few additional applications that are using Odoo API have been developed: - Mobile Application for employee - A chrome browser extension for recruiter's interaction with Linkedin.

Integrated with:

- Facebook;
- Google analytics;
- HubSpot;
- 1C;
- PayPal;
- WayForPay;
- Moneris;
- 3cx;
- Linkedin.

**Technologies:** Node.js, Python, JavaScript, Odoo, JQuery, PostgreSQL.

**Team:** Work in the team with 7+ people.

## Seattle Products Exchange

*Software Developer, Team Lead*

In the countries where cannabis production has been legalized, there's a lack of specialized high-quality software that minimizes the need for human labor use. The idea behind this fully-fledged web platform is to cover the needs of cannabis production and retail on a narrow and highly regulated market. The service helps to manage and operate the business from the very first steps to full-cycle cannabis production.

**Technologies:** Python, JavaScript, PHP, Atom Shell.

**April 2007 – October 2016,** Simbioz company.
